Re: Jicarilla Tribal Contract 47 #1; I-12-23N-04W

Gentlemen:

Our records show that you are perforated out of zone. The referenced well is approved to produce only from the Chacon Dakota formation. Your perforations are within the Greenhorn and Dakota formations. You've requested to reperfurate these zones and to test the Tocito and Gallup formations.

The Dakota zone will be separated from the Greenhorn, Gallup, and Tocito horizons by a packer. At present, the Gallup Tocito and Greenhorn are considered to be one source of supply. These zones do not need to be separated.

Form C-107 (Application for Multiple Completion) will be filed, according to Rule 112-A. Both are included with this letter. These must be filed immediately.

If you have any questions please call this office.

Yours truly,

A handwritten signature in cursive script that reads "Jeff A. Edmister".
