Re: State J Well No. 1
Unit A, Section 16, Township 23 North,
Range 7 West, NMPM, Rio Arriba County,
New Mexico.
Basin Dakota, Undesignated Greenhorn, and
Lybrook Gallup Pools.

RECEIVED
OCT 20 1987
OIL CON. DIV.
DIST. 3

Gentlemen:

Reference is made to your recent application for an exception to Rule 303-A of the Division Rules and Regulations to permit the subject well to commingle the production from all three pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303-C, and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the zones is hereby placed in abeyance.

In accordance with the provisions of Rule 303.C.4., total commingled oil production from the subject well shall not exceed 40 barrels per day, and total water production from the well shall not exceed 80 barrels per day. The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

In accordance with the provisions of Rule 303-C, the supervisor of the Aztec District Office of the Oil Conservation Division

shall determine the proper allocation of production from the
subject well following its completion.]

Pursuant to Rule 303-C 5, the commingled authority granted
by this order may be rescinded by the Division Director if, in
his opinion, conservation is not being best served by such
commingling.

Very truly yours,

A handwritten signature in dark ink, appearing to read "William J. Lemay", is written over the typed name. A long vertical line extends from the bottom of the signature down towards the distribution list.

WILLIAM J. LEMAY,
Director
