DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to set 60 feet of 10 inch and drill with rotary to Entrada sand at approximately 1100 feet. If production is encountered will set 7" casing to Total Depth and perforate.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
