Dear Gene:

Re: Albuquerque Associated #1 Vigil  
NMSB Sec. 14-12N-6E, Sandoval County

By letter of September 3, 1954 I notified the Albuquerque Associated Oil & Gas Company of New Mexico that we could not approve plugging on their #1 Vigil well until Form C-105, Well Record, had been filed and form C-103, Report of Plugging, had been filed showing that the well had been plugged back and successfully completed as a water well. We do have on file the affidavit filed by Mr. Vigil saying that he accepts the well as his and the future plugging responsibility; however as I see it Albuquerque Associated cannot be released under the plugging bond unless the well is either plugged or transferred to a bonded individual. I do not believe that Mr. Vigil has a plugging bond; therefore I would hesitate to approve cancellation of Albuquerque Association's bond until they have set a cement plug as they indicated they intended to do and converted the well to a water well.

Yours very truly

Mr. J. H. ...  
Oil & Gas ...  
... of New Mexico

Dear Sir:

On January 17, 1935, I visited the Albuquerque Associated Oil ...  
Company of New Mexico, Inc., and we went to the ...  
well ... had been filled and ...  
of ... had been filled showing that the well had been plugged ...  
and successfully completed as a water well. We do have on this ...  
... that he accepts the well as his and ...  
... responsibility; however as I am in Albuquerque associated  
... the plugging bond means the well is other plugging  
... I do not believe that in 1935  
... I would hesitate to approve cancellation  
... until they have set a cement plug as  
... and converted the well to a water well.

Yours very truly

Harry C. Arnold
