U. S. GEOLOGICAL SURVEY
SANTA FE, NEW MEXICO
15 FEB 1962

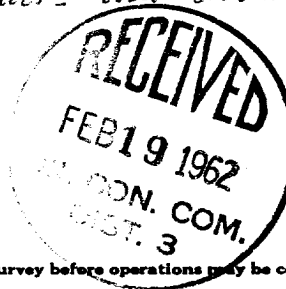

Well No. 91 #1 is located 740' ft. from [N] line and 330' ft. from [W] line of sec. 3
S10/4 NW/4 NW/4 15 N, 3 W NM PM.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Solidat Sandoval New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6004' ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

If we have to abandon hole (in Dakota), will plug top with 200' cement plug, as well as place another 50' (?) plug at depth of 675', as suggested. Driller's circulating pump went bad on him at 920', causing him to shut down temporarily, in November, for repairs - will resume drilling operations, as soon as weather permits -

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
