GEOLOGICAL SURVEY

100 OF 011 110 110 210 210

[illegible]

1 100' of 5 1/2" auger casing used (cemented in) -
1 Took 10' & 5' cuttings in sample bags -
1 Grout pour on well / d. B. (dare, detardo) -
1 Apparently on upside of same fault which gave us so much water trouble (go # X-1) on downside. Notice fault extends NNE-East SE and that we drilled on tail end of it. May try a more careful location, both, though; and placement of grout where, and otherwise / in brackets, I bet all go in the hole the (am I # X-1) -

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.
