(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

March 8, 1962

Delhi Federal Goodner

Well No. 1 is located 1980 ft. from N line and 1980 ft. from E line of sec. 28

NE/4 28

(1/4 Sec. and Sec. No.)

18N

(Twp.)

2W

(Range)

NMPM

(Meridian)

Wildest

(Field)

Sandoval

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 6923 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to set 7 5/8" csg @ 30 feet with 5 sacks cement; drill 6 1/4" hole to 1000 feet or Mesa Verde pay, whichever is shallower; set 4 1/2" csg w/100 sx cement if justified; expect first pay sand interval @ 540' and second at 900'. Will test intervals if justified and will core pays if possible. After setting 4 1/2" csg plan to perforate pays and frac if necessary. Mahew 1900 Rotary will be used. Plan to drill with air until too much water is encountered then drill on to T.D. with as little mud as possible. Surface and total depth will both be of Mesa Verde age.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company John K. Petty et al

Address 211 1/2 West Main Room 203

Farlington, New Mexico
