DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The plugging of the above well has been completed as follows: One 100' plug placed in the bottom of hole. One 100' plug placed from 750' to 770' and one 10' plug placed on surface. These plugging instructions were given from the Farmington Office. A total of 27 sacks of cement were used in this operation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
