17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

By letter "Decision - Lease Terminated" the office of Bureau of Land Management, Division of Lands and Minerals, Program Management and Land Office, Santa Fe, New Mexico, terminated the above reference lease. Letter dated 7-16-68.

By agreement of the Farmington office I made a deal with Mr. Johnny Myers for the plugging of the wells on this lease and the cleaning up of same for the equipment. Mr. Myers has been contacted and he states that the Kathy well has been plugged as follows.

8-30-68 " Cement Plug from TD to 730'.
Set Surface plug and Marker.
Casing left in well."

Fit will be filled and fence will be moved. At that time another report will be filed with this office.

The old abandoned cable tool rig that is on this land was there long before I ever had a Federal Oil and Gas lease. Judging from the appearance of the rig, I would say that it has been there at lease 20 years. I do not own it or know who does.

This lease was purchased from Mr. J. I Harvey and I presume that he filed any logs he ran at the time he drilled this well. After I bought this lease I filed a new name "Kathy Lease" but the well itself was drilled by him.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
