

5. LEASE DESIGNATION AND SERIAL NO.

LEASE DESIGNATION
SF 078656-I

(Do not use this form for proposals to drill or to deepen or plug back to a different reservoir.
Use "APPLICATION FOR PERMIT—" for such proposals.)

16. **Check Appropriate Box To Indicate Nature of Notice, Report, or Other Data**

SUBSEQUENT REPORT OF:

REPAIRING WELL.

ALTERING CASING

ABANDONMENT*

ABANDONMENT*

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

- It is our intention to pull this well, check the casing, and attempt to fish out what appears to be a pump in the hole.

***See Instructions on Reverse Side**

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.

This well was put back on production and during the winter months it was shut-in because of weather. During this period some person or persons opened the valve on our tank and let all the oil drain out onto the ground. This was reported to me by our pumpjack, Joe Morrow. I examined the lease later and saw where in the oil had drained out onto the ground.
