Wilcoat Sandoval New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6708 ft. Gr.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

In answer to your letter of July 10, 1964, I have the following to report:

13' of Oil on hand December 1, 1963

Sold first bbl of oil January 15, 1964 - 167.20 Barrels

This well is now making about six to seven barrels daily, with 10 to 15% Water.

The gravity of the oil is 32.1 and we are being paid \$2.15 per barrel. The total amount of oil sold off of this lease is 787.92 and a tank was sold in July for which I haven't received the ticket. I trust this will cover all your questions. The reports to the Geol. Dept have been brought up to date.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
