DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

PLUG BACK TOTAL DEPTH 1250'

As a result of failure to effect productivity from subject well, we propose to plug and abandon the above well by filling up with Mud Laden Fluid from 1250' and spotting a 25 sack cement Plug in top of 10-3/4" Surface Casing. A 4' regulation monument will be erected.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
