DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a hole at the above location to an approximate depth of 4200' in an attempt to gain stratigraphic information about the Gallup sand. 250' of 8 5/8" O.D. surface casing will be set and cemented to surface. Should any commercial shows of hydrocarbons be encountered a 4 1/2" O.D. oil string will be set.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
