DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drilled to 4376' T.D. without encountering any commercial shows of hydrocarbons. We propose to plug and abandon this well by placing the following cement plugs through drill pipe. These plugs were verbally approved by U.S.G.S. representative, Mr. Richard Krahle.

3250-3150' - 33 ft<sup>3</sup> cement  
2200-2100' - 33 ft<sup>3</sup> "  
321- 271' - 20 ft<sup>3</sup> "  
39- 10' - 10 ft<sup>3</sup> cement in top of surface casing.

A subsequent report of abandonment will be submitted following location clean-up.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
