DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Proposed Mesaverde formation test to approximately 4,000' or production. Operator intends to set 120' of 10 3/4" surface casing to be cemented with sufficient cement to circulate to the surface. Production string to consist of 7" casing to be cemented on top of whatever production zone may be encountered within the Mesaverde formation with approximately 150 sacks of cement.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
