O. L.

The elevation of the ~~datum~~ above sea level is 6773 ft. (ungraded)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a depth sufficient to test the Gallup Sandstone Formation, such depth estimated to be not more than 5,000 feet. 8 5/8 inch surface casing will be cemented at approximately 150 feet, circulating to top of ground with 200 sacks of cement. We will drill a 7 7/8 inch hole through the Gallup, and run electric logs, using rotary tools. If production string is necessary we intend to cement 5 1/2 inch, 15.5 pound, casing with 250 sacks of cement through the producing horizon and perforate. Sand-oil free will be carried out if found advisable.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Well Location and/or Gas Proration Plat

Date _____

Operator Haynes and V. T. Drilling Company Lease _____

Well No. 1 Fed.-Duff Section 3 Township 21 North Range 7 West NMPM

Located 660 Feet From South Line, 1980 Feet From West Line,

Sandoval County County, New Mexico. G. L. Elevation 6773, ungraded

Name of Producing Formation _____ Pool _____ Dedicated Acreage _____

(Note: All distances must be from outer boundaries of Section)

NOTE

This section of form is to be used for gas wells only.

SCALE: 1"=1000'

1. Is this Well a Dual Comp. ? Yes ___ No ___
2. If the answer to Question 1 is yes, are there any other dually completed wells within the dedicated acreage?
Yes ___ No ___

This is to certify that the above plat was prepared from field notes of actual survey made by me under my supervision and that the same are true and correct to the best of my knowledge.
