Well No. 1 is located 1280 ft. from N line and 660 ft. from E line of sec. 24

Sec. 24 23 7 NA
(G. Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Federal Rogers Block 078360 San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. will advise

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with rotary tools to an approximate depth of 6500' to test the Gallup-Tacito and Dakota Sands. Approximately 300' of 10 3/4" 32# surface casing will be set and cemented to surface. If commercial production is encountered, a 5" O.S. production string will be set and cemented and the well completed in a conventional manner.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Continental Oil Company

Address Box 206

Craig, Colorado
