13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On May 8, 1992 Gola No.1 well hole was plugged with 22½ sacks of Glass "B" cement using 4½ gals. to 4½ gals. of water per bag mix. 5 ft. high dry hole marker was set and filled with cement. B.L.M. was notified of the intent of the action on May 6, 1992.

On May 13, a new hole location was staked on top of the Mesa in the same (SENW) ¼ section. It appears that the existing pit of Gola #1 would be to far away from the next hole when it is staked down in the canyon. So notice is hereby given that the pit will will be abandoned and filled in by me. Work will be done intermittently as I go back and forth to the site. Plastic lined pit is now dry and the plastic will be buried at the bottom of pit.
