The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of California:

1. The total area of land owned by the United States in California is approximately 60 million acres.

2. The majority of this land is located in the western part of the state.

3. The land is primarily used for grazing and agriculture.

4. The land is managed by the Bureau of Land Management, which is responsible for protecting the public interest in the land.

5. The land is available for lease or purchase by private individuals or companies.

6. The land is also available for donation to certain organizations.

7. The land is subject to various regulations and restrictions.

8. The land is a valuable resource for the State of California.

9. The land is an important part of the State's heritage.

10. The land is a source of pride for the people of California.

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked", or left in the well, give its size and location. If the well has been abandoned, give date, size, position, and manner of abandonment. If pipes or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing or shooting.
