

100 - 110	100% Shale, gray, soft, bentonitic, slightly carbonaceous.
110 - 120	Sandstone, light gray, fine-grained, silty, micaceous, carbonaceous, some soft, bentonitic.
120 - 130	100% Coal, black, shaly, soft.
130 - 140	100% Shale, gray, soft, bentonitic, carbonaceous, with micro-inclusions of carbonaceous material.
140 - 150	100% Sandstone, fine-grained, white to light gray, glauconitic, carbonaceous.
150 - 160	100% Shale, gray, soft, bentonitic, carbonaceous
160 - 170	100% Coal, black, soft, shaly, with shale laminations.
170 - 180	100% Siltstone, gray carbonaceous, shaly soft, bentonitic.
180 - 190	100% Sandstone, tan, med-grained, well sorted glauconitic, Slightly carbonaceous, slightly calcareous, fair to poor porosity. Good oil stain and fluorescence. Good cut.
190 - 260	100% Sandstone, white, "salt and pepper", medium to fine-grained with rounded quartz grains cemented by white bentonitic clay. No shows. looks wet.
260 - 270	No Sample
270 - 280	50% Siltstone, gray, sandy, shaly, carbonaceous, interbedded with 50% gray, sandy shale.
280 - 310	100% Sandstone, light gray, very fine-grained, carbonaceous, shaly, dense, tight. No shows.
310 - 320	100% Shale, gray, sandy, carbonaceous.
320 - 350	100% Siltstone, gray, sandy, a hard, dense, slightly calcareous.
350 - 400	100% Shale, gray, sandy, micaceous, slightly carbonaceous.
400 - 500	100% Shale, as above.
500 - 600	100% Shale, gray, sandy, micaceous, slightly bentonitic.
600 - 700	100% Shale, as above.
700 - 740	100% Shale, as above.
740 - 750	100% Siltstone, light gray, shaly, fine-grained, dense, tight.
750 - 780	100% Shale, gray, sandy.
