Re: Federal Media #6, H-22-19N-3W

An original C-104, with sections I thru VI, has never been approved on this well, and an allowable never written.

We received a completion report in May 1973, showing that the well was temporarily abandoned in June 1969 and that was our last correspondence.

The electric logs and deviation survey were never sent to us, and the Non-Standard Location was never applied for. Therefore, the C-104 sent to us for the change of oil transporter cannot be approved for that purpose. I have taken the name of the transporter off and used this C-104 for name change of operator, since there was none in the file.

If you have any questions, please call.

Thank you,

Luanne Hill
