Mr. Jerry Long  
U.S. Geological Survey  
P.O. Box 1809  
Durango, Colorado 81301

Dear Mr. Long,

Attached is the Sundry Notice reporting on the installation of the 120 hp Reda Pump in the Fluid Power Pump #1 well in the Media Entrada field of Sandoval County, New Mexico. We are very pleased with this installation and it appears that we increased the oil production by 230 BOPD.

As per our recent phone conversation, we are setting up a hearing for January, 1974 wherein we will request the increase in allowable from the present 348 BOPD per well to 550 BOPD per well.

Very truly yours,

*Dale R. Worth*

Denver, Colorado 80202  
Dear Mr. Smith:

Thank you for your letter of March 8, 1992, regarding the proposed mineral management plan for the 1000 West 1st Avenue site. We have reviewed your comments and will respond to them as soon as possible. We appreciate your interest in the project and your suggestions for improvement.

We are currently reviewing the plan and will contact you again once a final decision has been reached. We will also provide you with a copy of the final plan for your records.

Sincerely,  
John Doe
