AMENDED ADMINISTRATIVE ORDER NO. PMX-158

APPLICATION OF MERRION OIL AND GAS CORPORATION TO EXPAND ITS
PRESSURE MAINTENANCE PROJECT IN THE MEDIA ENTRADA POOL IN
SANDOVAL COUNTY, NEW MEXICO

ADMINISTRATIVE ORDER
OF THE OIL CONSERVATION DIVISION

Under the provisions of Division Order No. R-5017, Merrion Oil and Gas Corporation has made application to the Division on June 14, 1990 for permission to expand its Media Entrada Unit Pressure Maintenance Project in the Media Entrada Pool in Sandoval County, New Mexico.

NOW, on this 27th day of September, 1990, the Division Director finds that:

- (1) The application has been filed in due form.
- (2) Satisfactory information has been provided that all offset operators have been duly notified of the application.
- (3) No objection has been received within the waiting period as prescribed by Rule 701(B).
- (4) The proposed injection well is eligible for conversion to water injection under the terms of Rule 701.
- (5) The proposed expansion of the above-referenced pressure maintenance project will not cause waste nor impair correlative rights.
- (6) The application should be approved.

RECEIVED
OCT 1 1990
OIL CON. DIV
DIST. 2

IT IS THEREFORE ORDERED THAT:

The applicant, Merrion Oil and Gas Corporation, be and the same is hereby authorized to inject water into the Entrada formation at approximately 5220 feet to approximately 5230 feet through 2 3/8-inch plastic lined tubing set in a packer at approximately 5150 feet in the following described well for purposes of pressure maintenance to wit:

Media Entrada Unit Well No. 3
1980' FSL & 330' FWL (Unit L)
Section 14, Township 19 North, Range 3 West
Sandoval County, New Mexico.

IT IS FURTHER ORDERED THAT:

The operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

Prior to commencing injection operations, the applicant shall run a 4 1/2-inch liner from the surface to a depth of 5200 feet in accordance with the proposal set forth in the permit application. In addition, the applicant shall, prior to injection, plug and abandon the Media Entrada Unit Well Nos. 1, 2 and 4, located respectively in Units H and I of Section 15, and Unit K of Section 14, Township 19 North, Range 3 West, NMPM, in accordance with the plugging procedures outlined in the permit application.

Prior to commencing injection operations into the well, the casing shall be pressure tested from the surface to the packer setting depth to assure the integrity of said casing.

The casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing or packer.

The injection well or system shall be equipped with a pressure limiting device which will limit the wellhead pressure on the injection well to no more than 1044 psi.

The Director of the Division may authorize an increase in injection pressure upon a proper showing by the operator of said well that such higher pressure will not result in migration of the injected fluid from the Entrada formation. Such proper showing shall consist of a valid step-rate test run in accordance with and acceptable to this office.

The operator shall notify the supervisor of the Aztec district office of the Division of the date and time of the installation of injection equipment and of the mechanical integrity test so that the same may be inspected and witnessed.

The operator shall immediately notify the supervisor of the Aztec district office of the Division of the failure of the tubing, casing or packer in said well and shall take such steps as may be timely and necessary to correct such failure or leakage.

The subject well shall be governed by all provisions of Division Order No. 5017 and Rules 701-708 of the Division Rules and Regulations not inconsistent herewith.

PROVIDED FURTHER THAT, jurisdiction of this cause is hereby retained by the Division for the entry of such further order or orders as may be deemed necessary or convenient for the prevention of waste and/or protection of correlative rights; upon failure of the operator to conduct operations in a manner which will ensure the protection of fresh water or in a manner inconsistent with the requirements set forth in this order, the Division may, after notice and hearing, terminate the injection authority granted herein.

The operator shall submit monthly progress reports of the project in accordance with Rules 706 and 1115 of the Division Rules and Regulations.

Approved at Santa Fe, New Mexico, on this 28th day of August, 1990.
