Perforated one shot per foot on 2-6-72:

5154-58; 5075-78; 5056-58; 5045-49; 4990-95; 4951-53; 4932-36; 4911-18; 4800-04

Broke down w/ 650 gals. 10% MSA Acid that was in hole and 9600 gals. oil as indicated on attached Halliburton report.

Flowed & swabbed well back.

Intend to produce approximately one month to clean well up and then sand oil frac.

Note: We purchased 1219.65 net bbls. from our trucking division 1-25-71 thru 1-27-71 to break well down with and later sand oil frac. We will probably need more oil to frac with and we will request an authorization to haul frac oil and account for all oil purchased at that date. At the current time we are only asking for authorization to haul 228.57 bbls of frac oil.

18. I hereby certify that the foregoing is true and correct
