Dear Jerry:

Attached is an Application for Permit to Drill on the above referenced well together with a map showing information required for Items 1, 2, 3, and 4 of the U.S.G.S. requirements for development.

If the well is successful, the tank battery will be set at the well site. The well is to be drilled with air, and there will be no water supply or waste disposal.

We do not plan to do any surface damage, but plan to use the existing roads which have been recently graded in the area. We plan to use a small portable, truck-mounted rotary and drill with air and will not be constructing a location or digging pits.

Sincerely,

Morris B. Jones
