17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Bennett Federal #1 was completed as a gas well from the Menefee 4-5-74. No Market has been available for the gas due to the small productive capacity of the well and it has remained shut-in since completion. Surface casing consisting of 30' of 23#, 7" was set at 30' and cement circulated with 5 sacks. A 6 1/4" hole was drilled to total depth of 330' and 4 1/2", 9.5# casing set at 312' and cement circulated with 35 sacks. Completion is in open hole from 312' to 330'. No other productive zones are present in the well.

No casing well be recovered.

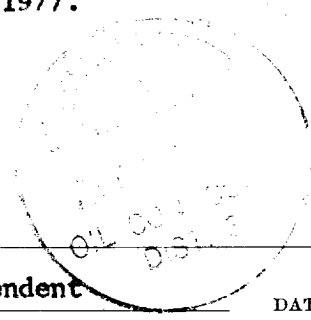

It is proposed to plug the well as follows:

Kill well with water

Circulate cement from total depth to surface using 30 sacks through tubing in the well.

After marker is installed and location cleared, notification will be given for approval of abandonment.

Work is expected to start about September 1, 1977.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
