(Other) **Temporary Abandonment**

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

In accordance with Memo No. 6-76 dated April 22, 1976 of the New Mexico Oil Conservation Commission, temporary abandonment is requested for the Bennett Federal #1 (gas well).

This well was completed April 15, 1974 and has not been produced because there is no available pipeline in the area at the present time. The nearest pipeline is 8 miles distant and cost to lay and tie-in is not currently economical. Additional development in the area will possibly create a market for the gas.

A copy of Shut-in Well Data Sheet filed with the Geological Survey in January, 1976 is attached.

18. I hereby certify that the foregoing is true and correct

SIGNED *Larry E. Neal*

## Instructions

**General:** This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

**Item 4:** If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

**Item 17:** Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
