13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Merrion requests approval to move a rig on this well as soon as possible in order to meet a deadline with the Farmington BLM office wherein Merrion has agreed to commence operations by September 30, 1994. By meeting the deadline we will hold a cooperative agreement in effect. No new hole will be drilled under this approval, but rather our intent is to clean out the existing wellbore only. No new surface disturbance will occur because the existing location is adjacent to and part of our existing central production facility for the Eagle Mesa field. A wellbore schematic is attached for your use.

This request is intended to supplement our pending APD now on file with your office and is not intended to replace it.
