13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Merrion requests approval to change plans by, in lieu of spotting cement, setting a cast iron cement retainer @ approximately 5,300'KB in the 7" casing and plugging back from the old Entrada section by pumping 50 sx (59 cuft) of class B neat cement. Will squeeze away approximately 25 sx. All other portions of our approved plan will remain the same.

We wish to use a retainer in order to produce a positive squeeze on the old interval while allowing the rig to immediately go ahead with checking for casing integrity without sacrificing the time required for waiting on cement as originally proposed.
