

DEVELOPMENT PLAN FOR SURFACE USE  
DIVIDE # 2 FEDERAL

Existing roads consist of N.M. 44, which passes within 550 feet of the drill location.

2. It is planned to install a gate beside N.M. 44 in the right-of-way fence, and construct about 600 feet of new road to the location. This road will be compacted only.

3. See Map

4. See Map.

5. See Plat.

6. Water will be hauled from private pond.

7. Combustible waste will be burned in burn pit. All other waste will be buried in pit at close of drilling. Cuttings will be buried in mud pit.

8. Trailer will be used on drill location.

9. N.A.

10. See plat.

11. Location will be leveled and re-seeded according to BLM recommendations.

12. In general, the location consists of a gentle slope to the south, with pimen and scrub pine cover along with grass and weeds.
