If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Well previously proposed to be Pictured Cliff test. Now propose to drill to 2700 ft. after original surface casing plan. Will test Chacra in addition to Pictured Cliff and if both productive will run 2-7/8", 6.5 lb./ft., J-55 casing and cement with 200 sax. If dual completion, will use 1" tubing and packer set at approximately 2550 ft. to isolate zones.

Surface disturbance will be unchanged from previous plan.
