- Point 10. Should the well be a commercial producer, it will be equipped to facilitate producing operations with all drilling pits filled, location leveled and well site reseeded in compliance with current Bureau of Land Management seeding requirements. During dry out time required for the reserve pit it will be fenced to eliminate livestock entry. All facilities will be painted Grey: Federal Standard 595-36357
- Point 11. The terrain consists of sage brush, blue gramma, snake weed, prickly pear cactus and scattered junipers. The soil is sandy. Approximately 250' of new road will be bladed from an existing road to the east.

Point 12.

John Alexander  
3E Company, Inc.
