U. S. GEOLOGICAL SURVEY
SARASNOTON, N. J.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to plug and abandon this well by placing 20 sacks cement from 2195 ft. to 1355 ft. and 6 sacks cement from 200 ft. to surface, inside casing. Will place a dry hole marker at the surface and reclaim the location per BLM specifications. No casing will be recovered.

We are plugging this well for lack of commercial quantities of natural gas.
