Dear Mr. Joe Ramey:

Southland Royalty Company requests a priority #6 Ruling on our Jicarilla 443 #1 (South Blanco Pictured Cliffs) located in the NE/NE of Section 8, T23N, R02W, Rio Arriba County, New Mexico.

The subject well ^{A-26} produces approximately 100 MCF/D of gas and 4.6 barrels of water per day. Due to the amount of water the well has to be swabbed after each shut in period. This is very expensive due to the mileage involved to and from Farmington.

Consideration of this problem will be greatly appreciated.

Sincerely,

James W. Smith
