13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

When this well was drilled 4 1/2" casing was set and cement circulated to the surface, shutting off all possible water encroachment and was used for a short time as a water injection well. It is our belief that it is capable for commercial oil production. We prefer not to plug this hole and will endeavor to put it on the pump within the next few months. Work to commence by October 1, 1991 or November 1, 1991.
