OIL and GAS PROPERTY MANAGEMENT

September 16, 1990

Coleman Oil & Gas

Alamos Canyon #1
1100' FNL & 1120' FWL
Section 15, T21N, R6W
Sandoval, New Mexico
Elevation 6839'
Lease No: NM 36941

RECEIVED
SEP 24 1990
OIL CON. DIV./
DIST. 3.

9-14-90:

Met Dan Ross with the BLM and located well.
SITP-423 psig, SICP-423 psig. Rig up 2" orifice tester
with a 3/8" orifice plate and connected to a 0-50 mercury
meter. Started test at 11:00 AM.

	11:00	open valve $\frac{1}{4}$	
	11:15	FCP-360	115 MCF/D
	11:30	FCP-295	98 MCF/D
	11:45	FCP-200	79 MCF/D
	12:00		
	12:15		
	12:30	FCP-180	68 MCF/D
	12:45	FCP-168	65 MCF/D
	1:00	FCP-150	64 MCF/D
Open valve to $\frac{1}{2}$	1:15	FCP- 80	98 MCF/D
	1:30	FCP- 45	64 MCF/D
	1:45	FCP- 30	52 MCF/D
	2:00	FCP- 25	38 MCF/D

Gas was completely dry throughout test. The nearest well that is hooked up in the NENE Sec. 10, had a line pressure of 280 psia. It is approximately 1 mile from the Alamos Canyon #1. The pipeline company is NWP. The well would probably produce with a compressor. Test complete.

Rio Puerco - Dan Ross
Is capable of producing in Ayriz
quantities.
