13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The well has not been returned to production. A workover effort was commenced 08/22/01 to return well to production. The rod string was found to be stuck in heavy scale and could not be pulled with the pulling unit used in this operation. A larger rig is scheduled to be in the area within the next three months. An attempt will be made at that time to correct the tubular problems and return to production at that time.
