17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In accordance with the verbal request of Mr. Simms, this well was filled with 34 sacks of regular cement from TD up into the surface casing right after the well was drilled--in October or November of 1980. Ablizzard prevented the completion of this task.

On December 21, 1981, the Leon Drilling Co. of Cuba finished the plugging operation with 12 sacks regular cement and the placing of a dry hole marker.

We will notify the USGS when the site has been completely leveled, cleaned up, and ready for final inspection.
