13. Describe Proposed or completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Merrion Oil & Gas has completed a review of the economics for the subject well and we propose to return the well to production. The well was damaged and water shut-off caused during the last workover on the well. We will perform a small fracture stimulation and return the well to production. Due to rig and frac crew availability and weather, we propose to complete this work by May 31, 2000.
