(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

We intend to plug and abandon this well. The well was drilled to a total depth of 595 feet. Excessive hole problems, stuck drill pipe, cost overruns and a pipe wrench thrown down the hole by vandals have led to the abandoning of the hole prior to reaching our projected T.D. All pipe and drill collars were recovered.

We will circulate cement from T.D. to surface with 105 SX of cement and place a piece of 4½" casings for surface marker 4 feet high and properly annotated. The location will be reseeded and the location cleaned of all foreign material.
