If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was formerly named the 1-34 Myra, however according to the lease regulations the name should be the No. 1 Demas. We therefore request this name change.

Drilled to 550 feet with 6 1/2 inch hole. Set 4.5 inch casing to total depth with 45 sacks of regular cement circulated to surface. Plan to perforate and acidize Menafes Sand from 345' to 450'. Work planned for latter part of December, 1965.
