(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. THIS WELL PRODUCED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Gary-Williams Oil Producer, Inc. respectfully requests approval to temporarily shut in the Tayler 29, #13 well for an indefinite time period. Current depressed oil prices make this marginal well uneconomical to produce.

This request is being done under the policy of suspension of production requirements for stripper oil wells on Federal and Indian lands.

The Tayler 29, #13 is completed in the Mancos Shale (Gallup) formation. Production averages less than 10 BOPD.

Due to the fact that there are remaining reserves from the Mancos Shale (Gallup) and significant undeveloped hydrocarbon potential, a temporary shut in period is requested. Approval for temporary shut-in status for this well would prevent premature abandonment of significant recoverable hydrocarbon reserves.
