Aztec Energy Corporation is requesting an approval for a one-year venting of casinghead gas from its Jicarilla "D" well. The well is located in the NE 1/4, Sec. 10, Township 22 North, Range 3 West, Sandoval County, New Mexico. The well was completed and ready for production on May 4, 1985. During a 24-hour production test the well had an initial potential of 32 BO, 21 MCF/D and 41 B/D. The gas-oil ratio was 602 cu.ft. gas/1 BO.

The approval for yielding is requested under conditions set forth by Part 641, Chapter 3, Title 31 of the Department of the Interior, Geological Survey. Conditions include: No additional stress shall be placed on yielding of gas during the test exceeding one year; no additional drilling activities, such as drilling or re-drilling, re-completing, or re-perforating shall be conducted during the test; and the test shall be conducted in accordance with the following conditions:

What the Government is attempting to do is to make the oil and gas business a monopoly. The Government is not only taking away the right of the people to own and control their own property, but it is also taking away the right of the people to own and control their own energy. This is a very serious threat to the future of the United States.
