Completion or Recompletion Report and Log form.)

17 DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated dates of starting and  
proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for each borehole and zone per-  
tinent to this work.) \*

1. Skim oil from reserve pit, utilizing a drain pit.

2. Evaporate the remaining fluid from the pit by pumping it through spray nozzles back over the pit area. Recycling this fluid through the system until the fluid level is low enough to reclaim the pit.

3. Fold all sides of the pit liner back to the center of the pit.

4. Remove the oil soaked soil from the unlined portion of the pit and spread it on the well pad. Not to exceed a 6 inch layer.

5. perform the necessary dirt work to fill and level the pit area.

6. Plow or blade the well pad on 30 day intervals to aerate the the oil soaked soil.

7. Reclamation to begin upon approval of this notice.

18. I hereby certify that the foregoing is true and correct
