Gary-Williams Oil Producer, Inc. respectfully requests approval to temporarily shut in the San Isidro 3, #16 well for an indefinite time period. Current depressed oil prices make this marginal well uneconomical to produce. The San Isidro 3, #16 was shut in in April 1986 due to a mechanical problem. Production during March 1986 averaged 3.6 BOPD. Approval for temporary shut in status for this well would prevent premature abandonment of significant recoverable hydrocarbon reserves.
