13. Describe Proposed or Completed Operations (Clearly state all pertinent details; and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The San Isidro #3-16 well needs paraffin to be stripped from the tubing and put back on production. The cost to do this is approximately \$7,500. We plan on doing this, however it would be much wiser to wait until oil prices firm up from their current level.
