17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Champlin Petroleum Company requests approval to temporarily shut in the subject well for an indefinite time period. The current depressed oil price market makes this well uneconomic to continue to produce.

The well was shut in on 3/4/86. Production immediately prior to shut-in was 2 BOPD and 13 MCFD. In the year immediately preceeding the shut-in, the well averaged 4.5 BOPD. This qualifies the well in the "stripper" category.

Approval for a temporary shut-in would prevent premature abandonment of recoverable hydrocarbon reserves.

*Approved for shut-in
until 5-14-87*
