Max. Inj. Pres. _____

Pressured annulus up to 570 psi. for 30 mins. Test passed/failed.

NOV 16 1993

OIL CON. DIV.
DIST

REMARKS:

TA status will be applied for in the near future. well may be recompleted to the Fruitland Coal in the future. Bridge plug at 1750' with 10' cmt. TD 1740 as plugged back. Perforations at 1386-1394. Set packer at 1322'. Pressure up to 570 psi, lost 10 psi in 30 minutes. Small leak in collar below wellhead probably accounted for this drop. we couldn't eliminate this leak in two tries.
