10/14/93 We request permission for storage of oil and measurement of gas on lease V-1697 at the Alamito #2 located in Unit N of Section 32 Township 23 North Range 7 West NMPM. The well makes about 2.5 barrels of oil a day and about 16 MCF of gas a day. The two leases were unitized until the State Land Office terminated the Unit on October 5, 1993, effective July 1, 1991. Since the three Gallup wells were completed in 1987 the separator, gas meter and tank battery have been located at the Alamito #2. The marginal production of the Alamito #4 makes it uneconomic to establish a separator, gas meter and tank battery for this well alone. Allocation among the three wells will continue to be based on knowledge of the operation of each well.
