RE: Media Field Fresh Water Source Well  
*M* SESE, Section 14, T19N, R3W  
*SW SW*

Dear Charlie:

Per our phone conversation on January 3, 1991, I have researched our files on the Media water well and we have virtually no information. What we do know is that the well has a submersible water pump capable of  $\pm$  600 BPD set at  $\pm$  800 feet on 2-3/8" tubing. The well is produced sporadically, mainly to water the livestock for a local rancher.

I am sorry we can't provide more information. Please send me a copy of everything you have to help make our files more complete. Thanks.

Sincerely,

George F. Sharpe  
Engineer
